TITLE : PROJECTION SCREEN

ABSTRACT : **PROBLEM TO BE SOLVED:** To provide a projection screen which has an irregular reflection characteristic, is not affected by external light and does not generate a moire during projection.

SOLUTION: The projection screen has a main screen member consisting of a knitted structure and a gray surface film 3 which is formed on the projection surface side of the main screen member and has a thickness to expose the stereoscopic shape of threads 2a constituting the knitted structure in relief on the surface. The gray surface film 3 consists of a binder mixed with pigments.
